Navigating Systems – Logic Model

Step 1: CCF will convene a series of focus groups to help define the necessary project elements and most effective methods to be used in the development of the web based application.

Step 2: CCF will pilot and test the application on a sufficient number of test subjects from each end user category which will include the following groups:

- Parents
- Youth
- Local Human Services Workers

Step 3: CCF will broadly disseminate and publicize the application across New York State and initiate a formal evaluation process to measure the impact of the project.

Inputs	Activities	Outputs	Long Term Outcomes
1. CCF staff along with senior staff Advisory Group will work to identify appropriate individuals to comprise focus groups.	1. A project manager will be hired. 2. Focus groups will be convened and provide input describing what information would be most helpful to address their particular needs and concerns. 3. Information from all focus groups will be compiled into a summary document for the Advisory Group. 4. The Project Manager and the Advisory Group will meet and review recommendations and discuss major components of Navigating Systems application. 5. A preliminary project plan will be developed. 6. A web programming group will be hired to building the navigating systems website. 7. Communications will be developed to share information about navigating website development. 8. CCF will pilot preliminary website and obtain and evaluate feedback. 9. Web programming group will implement suggested changes/improvements.	1. Focus Groups. 2. Summary from Focus Groups. 3. Project Plan. 4. Pilot Website. 5. Webinars / Newsletters / Social Media. 6. Stage 1 Navigating Systems Web Application.	1. Parents, youth and local human service workers will have a preliminary web resource to help them learn about various state systems, as well as the steps necessary to pursue help for cross-systems youth.
