Mission Statement

The Council is charged with acting as a neutral body to coordinate the state health, education, and human services systems to ensure that all children and families in New York State have the opportunity to reach their potential.

Council Members

Greg Olsen, MSW
Acting Director, NYS Office for the Aging

Arlene González-Sánchez
Commissioner, NYS Office of Alcoholism and Substance Abuse Services

Gladys Carrión, Esq.
Commissioner, NYS Office of Children and Family Services

Nirav R. Shah, MD, MPH
Commissioner, NYS Department of Health

Elizabeth Berlin
Executive Deputy Commissioner,
NYS Office of Temporary and Disability Assistance

Michael F. Hogan, PhD
Commissioner, NYS Office of Mental Health

Roger Bearden, Chair
NYS Commission on Quality of Care and Advocacy for Persons with Disabilities

Robert M. Maccarone
Deputy Commissioner and Director, Office of Probation and Correctional Alternatives, Division of Criminal Justice Services

John B. King, Jr., EdD
Commissioner, NYS Education Department
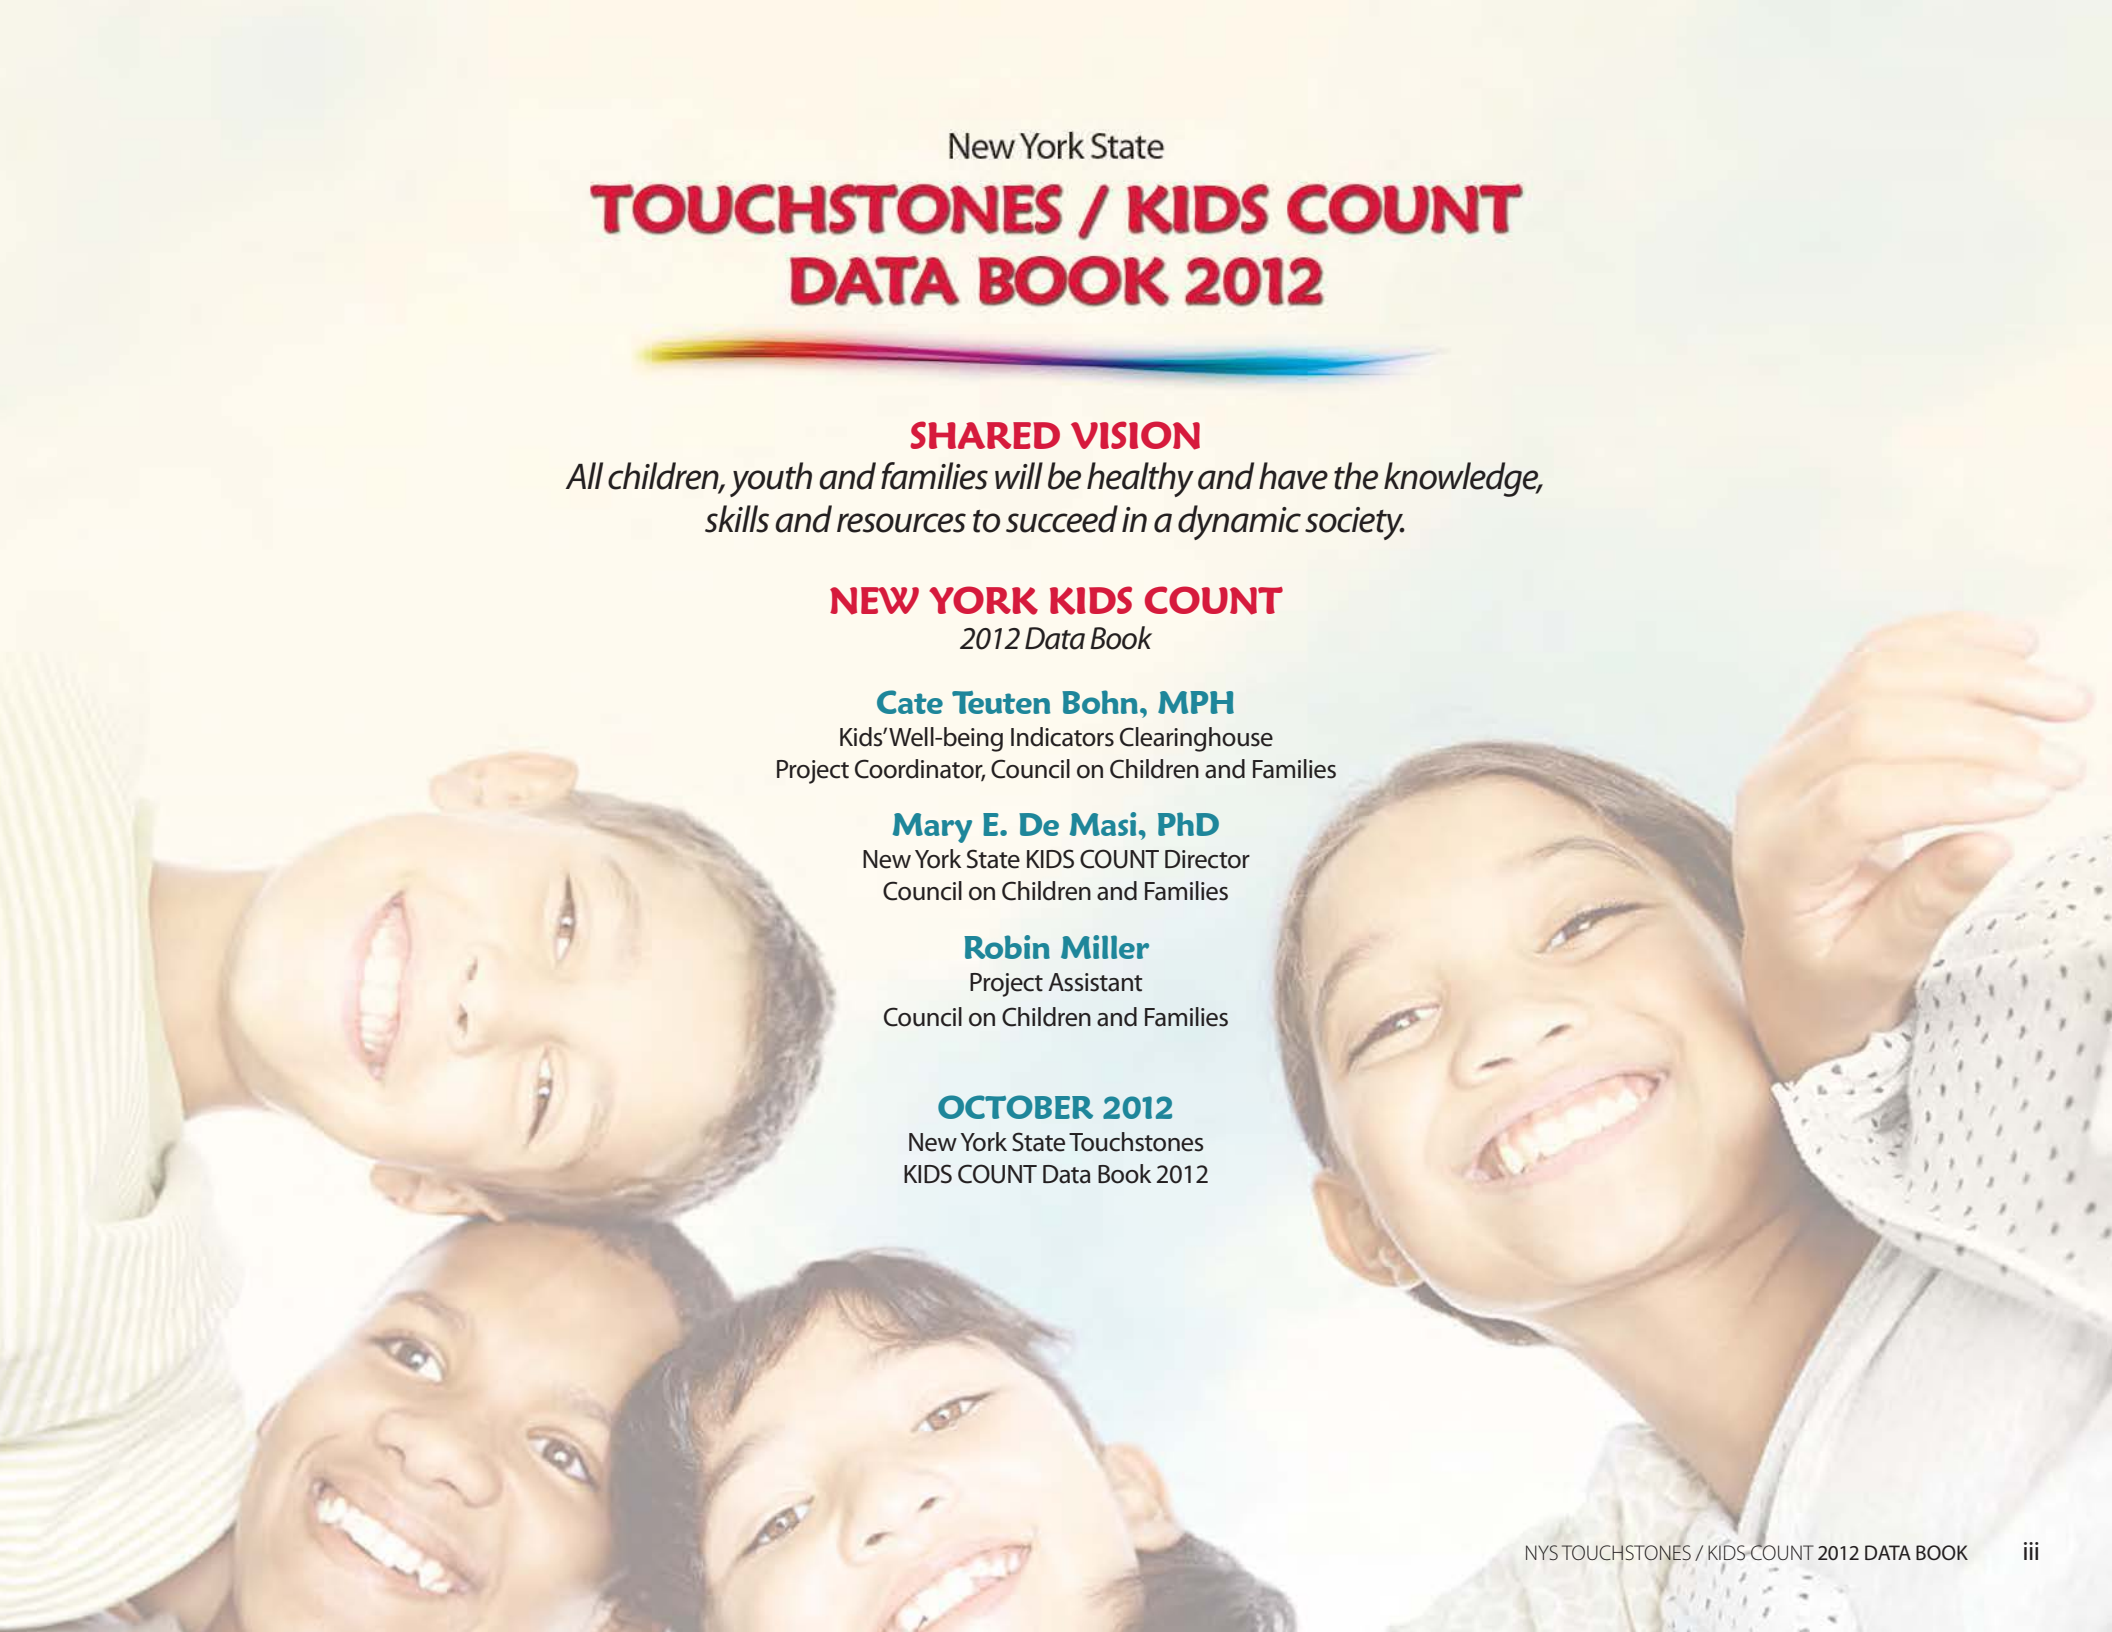

Michael C. Green
Executive Deputy Commissioner, NYS Division of Criminal Justice Services

Courtney Burke
Commissioner, NYS Office for People with Developmental Disabilities

Peter M. Rivera
Commissioner, NYS Department of Labor

New York State Touchstones
KIDS COUNT Data Book 2012

Council on Children and Families
52 Washington Street
Suite 99
Rensselaer, New York 12144

Andrew M. Cuomo
Governor

Deborah A. Benson
Executive Director

Dear Friends:

The over arching goal of the Touchstones framework is for all children and youth to be healthy and have the knowledge, skills and resources to succeed in a dynamic society. While there can be challenges to reaching this goal, we have learned that sharing comprehensive information with diverse audiences allows us to gain insight from multiple perspectives and it is this knowledge that enables us to arrive at sound decisions that benefit the children and families of New York.

It is with great pleasure that I present the 2012 New York State Touchstones/ KIDS COUNT Data Book. This year's edition, in conjunction with the Council's Kids' Well-being Indicators Clearinghouse (KWIC) website, offers the type of thorough information needed to promote healthy communities while enabling planners to disseminate that information to broad audiences who can help achieve successful outcomes for our children and families.

You will see that this year's data book visually combines data about the well-being of children in each county with information about community resources that support their healthy development (e.g., location of WIC clinics). Additionally, we have incorporated social media features. The new visualization and social media tools allow us to more accurately depict our communities; educate fellow New Yorkers about the important issues that are impacting children's daily lives; and guide our conversations and decisions around healthy child development.

The ever changing field of technology has opened new frontiers that allow us to share the stories of children and families in New York. I encourage you to explore the changes and share them with your colleagues.

Sincerely,

Deborah A. Benson
Executive Director
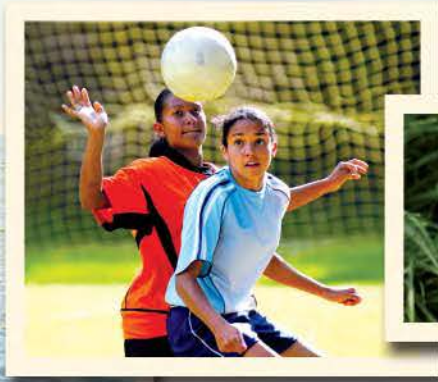

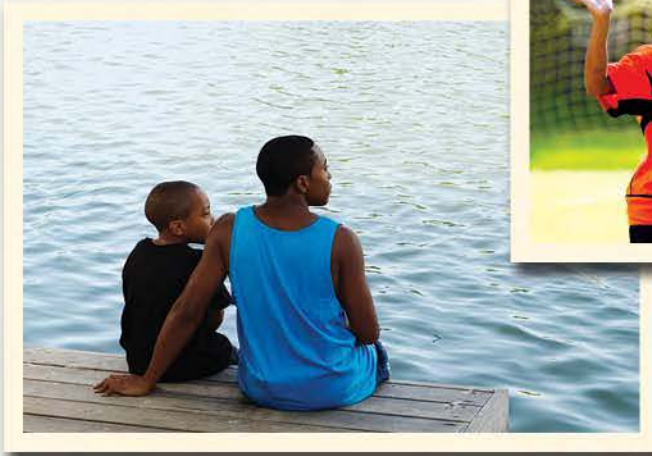

TOUCHSTONES EXECUTIVE TEAM

Maria Barrington, NYS Office for Court Administration

Deborah A. Benson, NYS Council on Children and Families

Cate Teuten Bohn, NYS Council on Children and Families

Mary E. De Masi, NYS Council on Children and Families

Table of Contents
2012 New York State Touchstones / KIDS COUNT Data Book:

2012 Touchstones / KIDS COUNT:

All Data Are Local

The theme of the 2012 Touchstones / KIDS COUNT data book is all data are local. The Touchstones framework is a tool to help guide state and local efforts. The common set of goals and objectives cuts across all service systems and allows individuals and organizations with diverse missions to come together to improve conditions for children, youth and families. The Council on Children and Families (CCF) has continued its commitment to providing quality data with its true partnership with sister state agencies on the Kids' Well-being Indicators Clearinghouse (KWIC) and within the annual Touchstones / KIDS COUNT data book. The Annie E. Casey Foundation national KIDS COUNT program partially supports both KWIC and the annual data book and CCF is grateful for their support.

This year's data book visually combines data about the well-being of children in each county with information about local resources that support their healthy development (e.g., location of Women, Infant and Children (WIC) clinics). The CCF has explored different ways to provide sub-county (e.g., towns, cities, or local) data to KWIC users and to display data with a local resource proved most compelling to CCF and KWIC's focus group members. CCF has incorporated sub-county level data within a map in each county overview in this data book. While these data from the U.S. Census American Community Survey do have challenges with small numbers for several rural areas, the local context of the data provide a necessary glimpse into the community status to support planning to improve children's outcomes.

All data are local and knowledge of where necessary resources utilized by families are located in your community is even more essential. Therefore, the CCF has mapped a select number of community resources on the county map to show the relationship between the data and community assets. Women, Infant and Children Clinics (WIC), Head Start and Early Head Start programs and Department of Labor One-Stop programs are resources utilized by low-income families to improve their overall health, nutrition (WIC); to ensure quality child care (HS & EHS); and to gain necessary employment skills (DOL-One Stop). When families are able to gain access to better nutrition and guidance during pregnancy and early childhood about child care options and attain 20th Century employment skills, they prosper and their communities prosper as a result.

Healthy Communities, Healthy Families, Healthy Children. These are the goals of the Touchstones framework with a sound foundation set in early childhood and provision of supportive systems and services to our adolescents and young adults for a successful transition to adulthood. Data are essential tools to help analysis
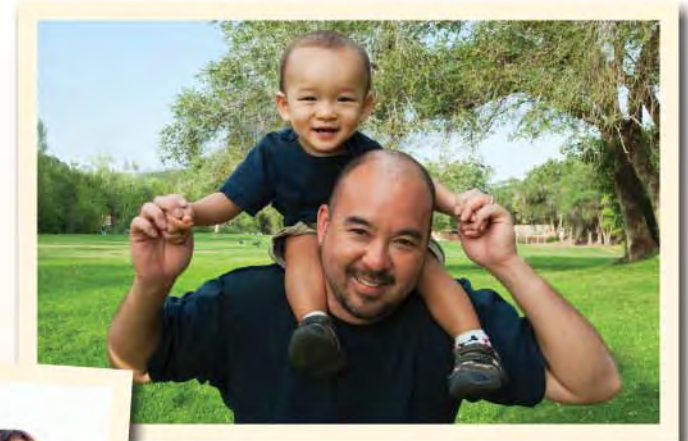

of community strengths and needs in the ongoing policy discussions for systems improvement and economic development. The recent U.S. Census has provided New York with the last decade in statewide demographics and we wanted to bring current demographic data to our readers and KWIC users. Spotlighted in a pie chart for every county are age group distributions from the U.S. Census 2010. These data are helpful to school district and child care planners, as well as, nursing home and hospice care providers. CCF will add demographic data to the Touchstones Community section on KWIC.

The ability to highlight different regions in the state; to acknowledge the geographic service delivery areas can be helpful to planners and policymakers. KWIC has developed a tool that allows users to select multiple counties to create their own custom region with a calculated regional rate for most indicators. This regional data comparison is promoted in the 2012 Touchstones / KIDS COUNT data book using the New York State Department of Health designated regions with the adolescent pregnancies for females ages 15-17 indicator.

Another purposeful addition to KWIC is the KWIC VIEW that allows users to capture graphs and maps designed on KWIC for local slide presentations and meeting handouts. The KWIC VIEW feature is available on the both the indictor and graphing pages and it captures the images of the graph with narrative about the data indicator. This KWIC VIEW can then be included in a slide presentation or grant proposal or used as meeting handouts. Please see included KWIC VIEW examples on the next section of the 2012 Touchstones / KIDS COUNT data book.
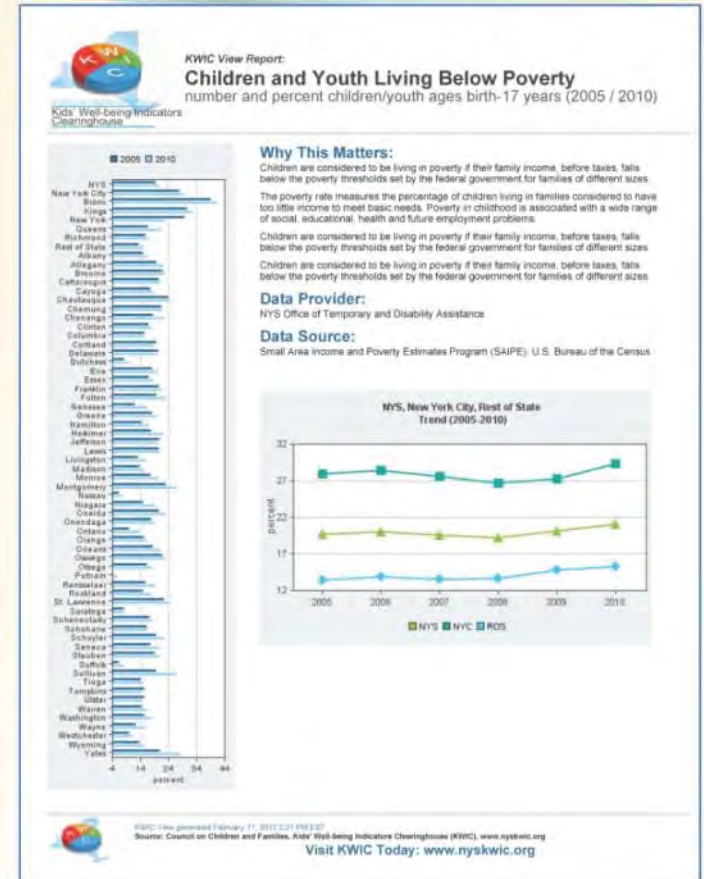

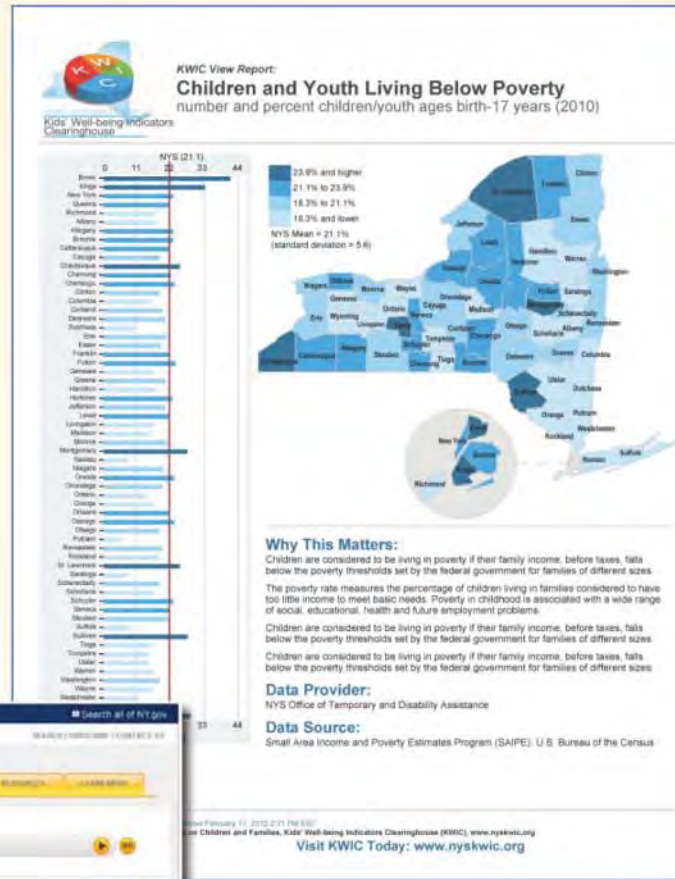

Data are critical as you work to find ways to serve children in these challenging times and local data can provide a nuanced view of your county's children and families. The Council on Children and Families will continue its commitment to improve outcomes for New York State's children and families by providing critical information and facilitating policy development, planning and greater accountability across the health, education and human services systems.

Announcing KWIC Views

KWIC Views are presentation-ready PDFs that are simple to create, print and share. Currently, there are two types of KWIC Views to choose.

KWIC View of Indicators – The first page of this KWIC View presents the indicator for a given year. A bar chart displays the rate for each county and a vertical line depicts the statewide mean. The map provides another visual comparison across counties with intervals for the maps based on the state mean and standard deviations from the mean. The second page of this KWIC View shows change over time. The bar chart displays changes in the indicator between the base year and current year. A trend line is included showing change over time for New York State, New York City and Rest of State. Both pages include information about the significance of the indicator (Why it Matters) as well as the data source and data provider for the indicator.

To generate this KWIC View, generate and indicator report and simply click the KWIC View link as shown.

Custom KWIC View – This KWIC View allows you to print a presentation-ready PDF of your custom query. The custom query lets you choose an indicator, year(s) and county(ies). This KWIC View displays your selections as a bar chart and data table along with supporting narrative documentation. If logged into your MyKWIC account, you can also create and display regional data in this KWIC View.

To generate this KWIC View, go to the Data Tools tab and select Custom Query. Follow the steps to create a custom query and simply click the KWIC View link as shown.

Why This Matters:

Children are considered to be living in poverty if their family income, before taxes, falls below the poverty thresholds set by the federal government for families of different sizes.

The poverty rate measures the percentage of children living in families considered to have too little income to meet basic needs. Poverty in childhood is associated with a wide range of social, educational, health and future employment problems.

Children are considered to be living in poverty if their family income, before taxes, falls below the poverty thresholds set by the federal government for families of different sizes.

Children are considered to be living in poverty if their family income, before taxes, falls below the poverty thresholds set by the federal government for families of different sizes.

Definition:
Age grouping distribution of the population in each county.

Data Source:
U.S. Census, 2010.

Adolescent Pregnancy Rate, 2005-2009
Definition:
Pregnancies are the sum of the number of live births, reported induced terminations of pregnancies and reported fetal deaths of all gestations. The adolescent pregnancy rate is the number of pregnancies per 1,000 females in the stated age group. Rates are presented for adolescent pregnancies for female ages 15 through 17 years.

Data Source:
2012 Council on Children and Families, Kids' Well-being Indicators Clearinghouse. Data provided by NYS Department of Health.

Data Notes:
- Pregnancies are the sum of the number of live births, reported induced terminations of pregnancies and reported fetal deaths of all gestations.

- Rates are per 1,000 females in the appropriate age group.

- To protect the confidentiality of females (whose pregnancies resulted in live births, spontaneous fetal deaths, or induced abortions) in Hamilton County, it was decided to merge its events with Essex County in tables where events have been categorized by age or race. The county names Essex/Hamilton and Hamilton/Essex give the same aggregated value.

- Rates are not stable when the number is less than 20.

Adults (25+ yrs old) that are Veterans, 2006-2010
Definition:
Data on veteran status are tabulated for the civilian population 25 years and older.

Data Source:
U.S. Census, American Community Survey (ACS) 2006-2010.

Adults (25+ yrs old) who have a Bachelor's Degree, 2006-2010
Definition:
Data on college degree status are tabulated for the civilian population 25 years and older.

Data Source:
U.S. Census, American Community Survey (ACS) 2006-2010.

Childhood Poverty Rate, 2010
Definition:
Percentages reflect children/youth ages birth-17 years living below poverty.

Data Source:
2012 Council on Children and Families, Kids' Well-being Indicators Clearinghouse. Data provided by NYS Office of Temporary Assistance and Disability.

Data Notes:
- Regional totals may not equal sum of counties due to rounding.

- The SAIPE estimates of poverty rates in each county are based on statistical models that use a variety of data available for each county to predict the poverty rate for that county.

2012 Touchstones / KIDS COUNT Data Sources (continued)

Infant Mortality (Three-Year Average) rate, 2007-2009

Definition:
Infant mortality is the number of deaths to infants under one year of age. Rates represent the average number of deaths to infants per year by age category per 1,000 live births.

Data Source:
2012 Council on Children and Families, Kids' Well-being Indicators Clearinghouse. Data provided by NYS Department of Health.

Data Notes:
- The number displayed for this three-year average is 0 yet the rate displayed is greater than 0. This occurs when very few cases are reported during a three year period. Due to rounding, the number is presented as 0 and the rate, while very small, is greater than 0.

- Regional totals may not equal sum of counties due to rounding.

- Three year average of total births by age category is used as the denominator in calculating rates.

- * Rates are not stable when the number is less than 20.

Young Adults Ages 16 and 21 years old Arrested for Driving While Intoxicated, 2010

Definition:
Number and rate/10,000 arrests for young adults ages 16 and 21 years old arrested for driving while intoxicated.

Data Source:
2012 Council on Children and Families, Kids' Well-being Indicators Clearinghouse. Data provided by NYS Division of Criminal Justice Services.

Foster Care Admissions, 2010

Definition:
Children admitted to foster care are those children under age 18 years who enter placement outside their home as the result of a court order in a given calendar year. Responsibility for the care and custody of these children is transferred, by court order, from the child's parents to the Commissioner of the local Department of Social Services. Children and youth admitted to foster care provides the number of children admitted to foster care during a given calendar year and the rate per 1,000 children 0 through 17 years in the general population.

Data Source:
2012 Council on Children and Families, Kids' Well-being Indicators Clearinghouse. Data provided by NYS Office of Children and Family Services.

Data Notes:
- N/A: Data not available.

- Children residing in St. Regis Indian Nation are included in the Rest of State and New York State totals; however, they are not included in Franklin County or St. Lawrence County data.

- Rates of children admitted to foster care reflect the number of children admitted per 1,000 children/youth ages birth-17 years.

- Rates are per 1,000 children/youth ages 0-17 years in the general population.

- * Rates are not stable when the number is less than 20.

Unemployment Rate (16+ years old) 2010

Definition:
Civilian unemployment is defined as individuals 16 years of age and older who were not employed but were able, available and actively looking for work during the week including the 12th of the month. Individuals

2012 Touchstones / KIDS COUNT Data Sources (continued)

who were waiting to be recalled from a layoff and individuals waiting to report to a new job within 30 days were also considered unemployed. The unemployment rate is the number of unemployed individuals per 100 persons in the labor force (the sum of employed and unemployed). Rates represent the annual average.

Data Source:
2012 Council on Children and Families, Kids' Well-being Indicators Clearinghouse. Data provided by NYS Department of Labor.

Data Notes:
- Estimates for New York State and New York City are based on regression models from the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. Other sub-state estimates are prepared by the Local Area Unemployment Statistics (LAUS) Unit of the New York State Department of Labor, Division of Research and Statistics and are based on a set by BLS.

- Regional totals may not equal sum of counties due to rounding.

- Rates are per 100 persons 16 years of age and older within the labor force.

Families Living Below Poverty Level, 2006-2010 (sub-county map)

Definition:
Poverty status is determined for adults with related children in housing units and non-institutional group quarters. The poverty universe excludes children under age 15 who are not related to the householder, people living in institutional group quarters, and people living in college dormitories or military barracks.

Data Source:
U.S. Census, American Community Survey (ACS) 2006-2010 (Table B1710).

Data Notes:
Data are based on a sample and are subject to sampling variability. A margin of error is a measure of an estimate's variability. The larger margin of error in relation to the size of the estimate, the less reliable the estimate. This number when added to or subtracted from the estimate forms the 90 percent confidence interval.

Community Assets (sub-county map)

County maps were constructed using the U.S. Census 2011 sub-county division shape files for New York state. The sub-county divisions primarily represent towns and city boundaries and do not include village jurisdictions. Community assets located in villages are included on the map but the village boundary and its name are not. Indian reservation boundaries sometimes cross multiple counties and are included here from the U.S. Census files. State and federal vital records and population data are assigned to one county for these situations, for example Cattaraugus Reservation touches three counties: Erie, Cattaraugus and Chautauqua. NYS Vital Records data and the Census/ACS data are assigned to Erie County.

Women, Infants and Children program (WIC) locations – provided by NYS Department of Health, March 2012.

Head Start and Early Head Start locations – provided by U.S. Administration for Children and Families, Region II, March 2012.

Department of Labor One-Stop locations (DOL One Stop) – provided by NYS Department of Labor, March 2012.

The Council on Children and Families is augmenting KWIC to include community assets in the near future.
