VARIABLES AT A GLANCE

Chronic school absenteeism

Variable Definitions:

New York State Education Department (NYSED) defines chronic absence as enrolled students who are absent (excused or unexcused) for 10 percent or more of instructional days.¹ Suspensions are not counted as absences, unless the student is absent on a day they are suspended. (8 NYCRR 100.21(f))²

U.S. Department of Education (USDOE) defines chronic absence as missing 10 percent or more of school days.³ Chronically absent students include students who are absent for any reason, regardless of whether the absence is excused or unexcused. Unlike in New York, suspensions are counted as absences. (Every Student Succeeds Act). (20 USC § 6301 et. seq.)⁴

Note: Chronic absenteeism or absence data differs from traditional attendance data because the emphasis is on missed instructional time without a focus on the reason(s) that instructional time is missed.

Methodology Notes:

NYSED School Report Card Chronic Absenteeism data compare each county with New York State, broken down by race and ethnicity and three other groups – English language learners, students with disabilities, and economically disadvantaged students. These three groups are defined as follows:

 Economically Disadvantaged students are those who participate in, or whose family participates in, economic assistance programs, such as the free or reduced-price lunch programs, Supplemental Security Income (SSI), Food Stamps, Foster Care, Refugee Assistance (cash or medical assistance), Earned Income Tax Credit (EITC), Home Energy Assistance Program (HEAP), Safety Net Assistance (SNA), Bureau of Indian Affairs (BIA), or Family Assistance: Temporary Assistance for Needy Families (TANF). If one student in a family is identified as low income, all students from that household (economic unit) may be identified as low income.¹

- English Language Learners (ELLs) are those students who, by reason of foreign birth or ancestry, speak or understand a language other than English and speak or understand little or no English, and require support to become proficient in English, and are identified pursuant to Section 154.3 of Commissioner's Regulations.¹
- **Students with Disabilities** are those students classified by the Committee on Special Education as having one or more disabilities.¹

Chronic absence data for elementary and middle schools (grades 1-8) and high schools (grade 9-12) are presented, respectively. Chronic absence data for kindergarten students is not yet collected in NYS.

USDOE enrollment data and absence data compare NYS and the U.S., broken down by race and ethnicity for students in kindergarten through grade 12.

Years Available:

- NYSED school year 2022-23
- USDOE school year 2021-22

 NYSED School Report Card Chronic Absenteeism data https://data.nysed.gov/

• USDOE enrollment data https://nces.ed.gov//ccd/elsi/default.aspx?agree=0

USDOE Absence data https://eddataexpress.ed.gov/

Reading and math proficiency

Variable Definitions:

NYSED uses four scoring levels from the New York State Testing Program (NYSTP) test in English Language Arts (ELA) and Mathematics based on the new Next Generation Learning Standards that define ELA and math proficiency (Levels 3 & 4) for all New York State students enrolled in public, private, and charter schools.⁵

USDOE National Assessment of Educational Progress (NAEP) uses scale scores of NAEP assessment questions for reading and mathematics.⁶ NAEP is known as The Nation's Report Card and has provided important information about how students are performing academically since 1969.⁷

Methodology Notes:

NYSED School Report Card data on fourth grade ELA results and eighth grade math results were disaggregated, respectively, to compare each county with NYS by race and ethnicity and three other groups – English language learners, students with disabilities, and economically disadvantaged students as defined above.¹

USDOE NAEP uses different fourth grade reading and eighth grade math tests to assess a small sample in every state to compare states and establish each state's standing nationally.^{8,7} USDOE NAEP Nation's Report Card results on fourth grade reading proficiency and eighth grade math proficiency were compared between NYS and the U.S. by race and ethnicity.

Years Available

Child poverty

Variable Definitions:

The Official Poverty Measure (OPM), often referred to as the Federal Poverty Level (FPL), from the U.S. Census Bureau's American Community Survey (ACS) defines poverty generally as when an individual or household does not have the financial resources to meet basic needs, such as food, clothing, and shelter. Used since the 1960's, the FPL compares pretax income to a national poverty threshold adjusted by family composition.⁹ For example, the poverty threshold for 2022 for a family of four people with two children under 18 years old is \$29,678.¹⁰

The Supplemental Poverty Measure (SPM), first released in 2011 and produced in collaboration with the federal Bureau of Labor Statistics (BLS), extends the OPM by accounting for several government programs that are designed to assist lowincome families but are not included in OPM calculations. SPM factors in income and payroll taxes, tax credits, and noncash benefits such as SNAP (Supplemental Nutrition Assistance Program) and housing assistance. Additionally, the SPM accounts for necessary expenses, including child support payments, work-related costs, child care, and medical expenses, which are subtracted from a household's

resources.⁹ SPM was used by the NYS Child Poverty Reduction Advisory Council in its 2024 Recommendations and Progress Report.¹¹

Methodology Notes

ACS 5-year poverty estimate data from the U.S. Census Bureau was aggregated for children ages 0-17 who lived in families with income below poverty level in the past 12 months to compare between NYS and the U.S. and between each county and NYS by race and ethnicity.

Years Available:

• ACS 5-year 2022 data

• NYS and County Poverty Estimates Tables B17020 A-I

SPM Estimates

• U.S. Census Bureau, Current Population Survey and 2022 to 2024 Annual Social and Economic Supplements (CPS ASEC)

WHY ARE THESE VARIABLES **IMPORTANT TO MEASURE**

The 2024 KIDS COUNT New York State County Data Book presents data across three different policy areas affecting New York children: chronic absenteeism, academic performance, and poverty. By grouping these three policy areas, the New York State Council on Children and Families (CCF) aims to provide a glimpse into the educational policy landscape, acknowledging the influences of child poverty and chronic absenteeism on student success and overall well being. While national data are provided to offer a reference point for comparing New York to other states, county level data are disaggregated by race and ethnicity, to reveal a window into the systems and structures that have perpetuated disparities in opportunity and achievement in New York State. On a national level, it was estimated that, if racial, ethnic, and gender disparities in educational attainment had been eliminated for the previous three decades, the U.S. gross domestic product would have been \$540 billion greater in 2019.¹² As we look to the future, our intention is that this county data book informs the unprecedented investments and improvements being led by Governor Kathy Hochul to support success for all New York children.

Within the past few years, Governor Hochul has taken significant action to help equalize opportunities for all children and families. Actions have included directing historic and targeted funding for child care and public education, prioritizing literacy for young children, and committing to halving child poverty in New York State by 2031.

It is within this policy environment that this county data book presents data on how New York's children are doing to better understand the challenges families and children are facing. Armed with this information, and in partnership with state and local agencies, CCF looks to promote datainformed decision-making for policies and programs that better educational outcomes for all New York children. Additionally, this county data book expands on national KIDS COUNT data and research presented by the Annie E. Casey Foundation to examine the unprecedented declines in student math and reading proficiency associated with the COVID-19 pandemic in the context of poverty and chronic absenteeism.¹³

The 2022 USDOE NAEP Nation's Report Card showed average state and national trends of 4th grade reading proficiency in Figure 1¹⁴ and 8th grade math proficiency in Figure 2.¹⁵

FOURTH GRADERS WHO SCORED AT OR ABOVE PROFICIENT READING LEVEL

Figure 1: Data source:

Education, National Center for Education

Statistics, National

Assessment of **Educational Progress**

(NAEP).¹⁴

Chronic absenteeism is an early warning sign that children may be falling behind academically, as it is a key risk factor that diminishes student learning and undermines educational efforts to support student learning.^{16,17} **Figure 3** from the USDOE NAEP shows that percentages of average score declines in both 4th grade reading and 8th grade math from 2019 to 2022 were associated with the rising rates of absenteeism even after controlling for student race/ethnicity, gender, and socioeconomic status.¹⁸ Based on the impact of attendance on educational outcomes, the federal Every Student Succeeds Act (ESSA) requires every state to share data on chronic absence.⁴ This county data book uses NYSED data to further display chronic absenteeism from grades 1-8 and 9-12, comparing each county and New York State, broken down by race, ethnicity, English language learners, students with disabilities, and economically disadvantaged students. Mapping of county and school district data on both chronic absence and reading and math proficiency is available at https://www.nyskwic.org/. Tackling chronic absenteeism requires a system-wide approach and local leaders' involvement and support.¹⁹

REPORTED NAEP AVERAGE SCORE DECLINES IN 2022 FROM 2019, PERCENTAGE OF DECLINES ASSOCIATED WITH THE RISING RATES OF ABSENTEEISM, BY SUBJECT AND GRADE

NOTE: The analysis is controlled for student race/ethnicity, gender, status as an English learner, eligibility for the National School Lunch program, number of books in the home, and status as a student with a disability. NAEP subject and grade scales are independent, and numeric results should not be directly compared.

SOURCE: U.S. Department of Education, Institute of Education Sciences, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 2019 and 2022 Mathematics and Reading Assessments.

Another significant factor impacting learning and the lives of children is poverty. Governor Hochul's Child Poverty Reduction Advisory Council has stated, the research is clear: childhood poverty leads to negative outcomes for children, starting at a young age.¹¹ Fewer than half of poor children are ready for school at age five, compared to 75 percent of children from families with moderate and high income.²⁰

Figure 4 from Return to Learn Tracker ©2023 of the American Enterprise Institute (AEI) shows that post pandemic nationwide chronic school absenteeism rates in 2022 almost doubled compared to the rates prior to the pandemic in 2018, and the rates in both years were escalated by poverty.²¹

Source: Return to Learn Tracker $\ensuremath{\mathbb{C}}$ 2023 of the American Enterprise Institute (AEI)

As the racial and ethnic disparities in employment and wages have existed for decades,²² **Figure 5** shows the American Community Survey (ACS) data to further illustrate such persistent disparities for children growing up in families with incomes below the federal poverty level over the past decade.^{10,23} These disparities are depicted for each county in this data book to inform policymaking at the local level.

Enterprise Institute (AEI).²¹

CHILDREN WHO LIVE IN FAMILIES WITH INCOMES BELOW THE FEDERAL POVERTY LEVEL

RACE & ETHNICITY CATEGORIES

The racial and ethnic data was collected and reported slightly differently across various sources in this county data book. The ACS data from the U.S. Census Bureau are based on self-reported racial and ethnic categories. The related data provided herein follows the standard ACS classification system for race and ethnicity to ensure consistency and comparability with national and state-level data.²⁶ The United States Department of Education (USDOE) and National Assessment of Educational Progress (NAEP) follow standards set by the U.S. Office of Management and Budget for collecting and reporting data on race and ethnicity.^{27,28} The New York State Education Department (NYSED) collects and reports the races and ethnicities according to USDOE guidance.^{29,30}

The racial and ethnic categories in this data book include:

- American Indian or Alaska Native refers to individuals with origins in any of the original peoples of North and South America (including Central America) and who maintain tribal affiliation or community attachment.
- Asian refers to individuals with origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam. This definition applies to data from sources such as the ACS, USDOE, and NAEP. NYSED data report "Asian or Native Hawaiian/Other Pacific Islander" as one category for students having origins in any of the original peoples of the Far East, Southeast Asia, Hawaii, Guam, Samoa, or other Pacific Islands, or the Indian

subcontinent, including Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam.

- Black or African American refers to individuals with origins in any of the Black racial groups of Africa.
- Native Hawaiian or Other Pacific Islander refers to Native Hawaiian, Guamanian, Chamorro, Samoan, and other Pacific Islander groups. This definition applies to data from ACS and USDOE sources. However, this category is not reported separately in NAEP and NYSED data.
- Hispanic or Latino refers to individuals of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin regardless of race. In this data book, the racial categories reported from NYSED and USDOE are non-Hispanic. Therefore, the Hispanic group and these non-Hispanic racial groups can add up to the totals.
- Other Race refers to individuals who do not identify with any of the specified categories. This applies to data from ACS. This category is not adopted in USDOE, NAEP, and NYSED data.
- **Two or More Races** refers to individuals identifying with more than one racial group. This applies to data from ACS, USDOE, and NAEP sources. NYSED data reports category Multiracial with the same definition.
- White refers to individuals with origins in Europe, the Middle East, or North Africa. Note, in accordance with the enactment of a recent New York State law, separate data on each major Middle Eastern or North African group will begin to be collected starting in 2025.²⁵

LOOKING AHEAD TO THE 2030 CENSUS AND OTHER CENSUS SURVEYS

The U.S. Census generates critical snapshots of America. This crucial tool helps policymakers and leaders assess progress, plan for the future, make political decisions, and improve the lives of children and families. Census data drives funding decisions for hundreds of programs, such as Head Start, Medicaid, and the Supplemental Nutrition Assistance Program. Census data also is used to highlight the well-being of communities and calculate representation in Congress. Leading up to the decennial census, it is important for local and state leaders to build relationships with stakeholders to uplift the importance of census and other surveys that provide essential population data.

In addition to the renowned decennial census,³¹ the U.S. Census Bureau conducts several ongoing surveys to provide essential data about the population between each 10-year count. The American Community Survey (ACS) is an annual survey providing 1-year and 5-year estimates for demographic, economic, and housing characteristics and offering detailed insights into topics such as education, employment, and income.³² The Current Population Survey (CPS), a monthly household survey conducted by the Bureau of Labor Statistics (BLS), is the primary source for labor force statistics, including unemployment rates.³³ The Economic Census conducted every five years, provides comprehensive data on U.S. businesses, industries, and market trends, while the Census of Governments collects data on the structure, activities, and finances of government entities.³⁴ The National Crime Victimization Survey (NCVS), in partnership with the Bureau of Justice Statistics, gathers data on crime victimization across the U.S.³⁵ Additionally, the Household Pulse Survey offers insights into the social and economic impacts of emergencies.³⁶

These ongoing surveys ensure that policymakers and leaders have timely, accurate data to address immediate needs, guide public policy, and allocate resources effectively, making the Census Bureau's work critical well beyond the decennial count. For more comprehensive information about the U.S. Census Bureau and its various surveys, please visit the Census Bureau's website. (https://www.census.gov/programs-surveys.html)

By staying informed, preparing, and encouraging participation in accurate and comprehensive data collection efforts, local leaders can lay the groundwork to inform and best support policymaking and planning.

LIMITATIONS & DISCLAIMERS

The potential of a child cannot be distilled to a scaled score on a standardized assessment, and the effectiveness of teachers or schools should not be gauged solely by test scores. These assessment test scores are one of many tools that should be used to help assess student learning.

Throughout this county data book, data from New York State is presented, broken down by county and different subgroups including race and ethnicity. National data is only provided to compare New York to other states. State and national definitions and data definitions and collection samples and processes vary.

As of 2022, New York State mandates the collection and reporting of separate categories for Asian and Pacific Islander groups, which include detailed subcategories for the major Asian and Pacific Islander populations.²⁴ While this data book currently includes broad categories for race and ethnicity, it is not fully aligned with the more detailed specifications outlined in New York State Executive Law. The goal is to incorporate these more specific Asian and Pacific Islander categories in reporting once consistently available. This will include subcategories for Chinese, Japanese, Filipino, Korean, Vietnamese, Asian Indian, Bangladeshi, Pakistani, and the ten most populous Asian groups in New York based on the five-year American Community Survey (ACS) published by the U.S. Census Bureau, as well as distinct categories for Native Hawaiian, Guamanian and Chamorro, and Samoan under the broader Pacific Islander grouping.

Pursuant to a new New York State law enacted in 2024, separate collection categories and tabulations for the white group in New York State will be disaggregated to include: each major North African group, including, but not limited to, Egyptian, Moroccan, Algerian, Tunisian, and Libyan; each major Middle Eastern group, including, but not limited to, Yemeni, Iranian, Palestinian, Iraqi, Lebanese, Israeli, Syrian, Armenian, and Saudi; and other Middle Eastern and North African groups, including, but not limited to, transnational indigenous communities like Amazigh and Syriac people.²⁵

The granularity and inclusivity of racial and ethnic reporting will be enhanced when these demographic data are available.
